BALER TWINES

PIIPPO® BIG SQUARE BALER TWINES

Optimize your money in big square baling by using a baler twine that matches your baler and the most challenging conditions. All Piippo twines offer guaranteed length and unrivalled knot strength when compared to other twines with the same m/kg runnage. Please visit www.piippo.fi to find more information on our twines!

	Actual running meters	Package size kg	Running meters/package	Pallet size
Ultra Master	85 m/kg	12 (single roll)	1020	864 kg
Cropmaster	105 m/kg	21 (2 roll pack)	2200	1008 kg
Super Extreme	110 m/kg	21 (2 roll pack)	2310	1008 kg
Extreme	115 m/kg	18 (2 roll pack)	2070	1008 kg
Magnum	122 m/kg	18 (2 roll pack)	2200	1008 kg
Big Square	130 m/kg	18 (2 roll pack)	2340	1008 kg
Original	145 m/kg	18 (2 roll pack)	2610	1008 kg

PIIPPO® CONVENTIONAL BALER TWINES

Piippo Traditional small square baler twine has been a classic since 1972. This twine is also perfectly reliable and offers up to 25% more meters than other types of twine on the market.

	Actual running meters	Package size kg	Running meters/package	Pallet size
Hay	300 m/kg	10	3000	800 kg
Traditional	400 m/kg	10	4000	800 kg

PIIPPO® ROUND BALER TWINES

Piippo round baler twines offer tight tolerances and stick extremely well to the bale.

	Actual running meters	Package size kg	Running meters/package	Pallet size
Round Bale	600 m/kg	10	6000	800 kg
Triathlon	700 m/kg	10	7000	800 kg
Long Champ	850 m/kg	10	8500	800 kg
Marathon	1000 m/kg	10	10 000	800 kg

PIIPPO BALER TWINES INCLUDE VALUABLE BENEFITS

MORE METERS PER KILOGRAM, PER PACKAGE AND PER PALLET

Piippo's unique Firm Film Technology, one pallet of Piippo baler twine will carry up to 25 km more twine than a pallet filled with competitor's corresponding twine. By using Piippo twine, you will gain more meters and less weight on each pallet and save on costs.

ACTUAL METERS GUARANTEED - BEWARE OF WHAT YOU BUY

Thanks to our accurate production standards, the baler twines run as much as the twine type indicates. The twine 130 runs 130 m/kg, and the twine 105 runs 105 m/kg. By choosing Piippo twine, you can get up to 25% more twine compared to the twines of other producers.

UP TO 30% HIGHER BREAKING STRENGTH OF ALL TWINE TYPES

The bales stay in good shape during storage and even withstand rough handling. Transport costs can be minimized, because the bales do not swell during storage time.

SAVINGS IN SPARE PART COSTS

The softest twine on the market runs smoothly in the baler and prolongs the lifetime of knotters and other expensive metal parts of the baling machine.

GREENER WORLD

Sustainability in Piippo's operations is achieved by efficient use of exhaustible natural resources. As a result of this, our clients will benefit from higher knot strengths, cheaper prices per meter and less waste. One kilogram of Piippo twine gives longer and stronger meters.
